SUMMARY

Motivated Software Developer with hands-on experience in developing responsive web applications using Python, Django, HTML, CSS, JavaScript, MySQL, Bootstrap, and React JS. Skilled in full-stack development, REST APIs, CRUD operations, authentication systems, AJAX integration, and database management. Developed projects including Expense Tracker, Smart Tourism Platform, Digital Smart Card System, and Pet Adoption Web Application. Passionate about problem-solving and building user-friendly applications with modern technologies.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML5, CSS3

Frameworks & Libraries: Django, React JS, Bootstrap, AJAX, jQuery, Chart.js

Database: MySQL

Tools & Platforms: Git, GitHub, VS Code

Concepts: REST API, CRUD Operations, Authentication, Responsive Web Design, OOP

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern – Regional Technologies

DEC 2025 – APRIL 2026

- Developed responsive full-stack web applications using Python, Django, HTML, CSS, JavaScript, Bootstrap, and MySQL.
- Implemented CRUD functionalities, authentication systems, and backend database integration.
- Built dynamic and user-friendly interfaces with responsive web design principles.
- Integrated AJAX and jQuery for asynchronous updates and improved user experience.
- Worked on debugging, testing, and optimizing application performance.
- Collaborated on real-world projects using GitHub and modern web development practices.

EDUCATION

Masters of Computer Application (MCA)

2024 – 2025

GPA : 7.92

Bengaluru City University

Bachelor of Computer Application (BCA)

2020 – 2023

GPA : 5.983

Calicut University

PROJECTS

MCA Final Year Project

July 2025 – October 2025

Blockchain-Based Online Police Complaint Management System

- Developed a secure complaint management web application using Python, Django, and MySQL with authentication and admin dashboard features.
- Implemented blockchain-inspired secure data handling and complaint tracking for improved data integrity and transparency.

Pet Adoption Management Web Application

- Built a responsive pet adoption platform using Django, HTML, CSS, JavaScript, and MySQL for managing pet listings and adoption requests.
- Implemented user authentication, pet management, and dynamic CRUD functionalities with responsive UI design.

Expense Tracker Web Application

- Built a full-stack Expense Tracker web application using Django, Bootstrap, AJAX, and Chart.js for managing daily expenses and analytics.
- Implemented CRUD operations, interactive charts, real-time filtering, authentication, and responsive UI for efficient financial tracking.

EduLearn LMS (Learning Management System)

- Developed a full-stack Learning Management System using Django with role-based authentication for students, instructors, and admins.
- Implemented course management, student enrollment, responsive UI, and dynamic learning features using Django, HTML, CSS, JavaScript, and MySQL.

Smart Tourism Web Application

- Developed a tourism management platform for exploring destinations, travel packages, and booking-related services using Django and MySQL.
- Implemented responsive frontend design, user authentication, and dynamic content management features.

Digital Smart Card System

- Built a premium modern Digital Business Card web application with mobile-first responsive UI using HTML5, CSS3, JavaScript, and modern design principles.
- Implemented advanced features including QR integration, WhatsApp sharing, interactive contact actions, animations, custom share preview, and Google Analytics integration.
